Yes	No
-----	----

If you answered no, skip to question 20.

19a. Job placement rates for students completing certificate programs and CTE (career-technical education) degrees for last three years available data:

For the purposes of the Annual Report, Job Placement Rate is defined as the percentage of students who are employed in the year following completion of a CTE (career-technical education) certificate or degree program. (This means that the denominator for the 2022-23 job placement rate will be the number of students who completed the program in 2021-22.) Report only those programs with a minimum of 10 students in the completion year. For example, if a program had 9 students complete in 2021-22, you do not need to report a job placement rate for 2022-23. Report only those programs for which reliable data are available. If your institution has defined its job placement rate differently than what is described above, you may complete this question using your local definition – but please describe your definition and methodology in Question 19.

20. Please use the text box below to provide any comments or context regarding the data submitted in this report (optional, no word limit):

21. Reflecting on your Institution's student achievement(s), what efforts/initiatives/competencies have you found to be fundamental in supporting the recent successes you've observed/reported? Please describe any innovations and improvements along with a brief narrative of how it was achieved.

Citrus College's enrollment has consistently increased since the pandemic and the consequent drop in achievement headcount has also begun to increase with 2023-24 representing an apparent and expected trough. Collaboration between student services, academic affairs, and institutional research provides clear pathways for students. Other technological adoptions have improved student messaging, including implementing Motimatic, which assists with contacting students who have stopped out and provides information about how to register, and Element 451, an agentic AI with several options for providing students information and answers to questions in real time. In response to AB 705/AB1705, assembly bills aimed at math and English reforms, Citrus College faculty made major curricular changes resulting in significantly increased and sustained numbers of students completing transfer level English and Mathematics (statistics). Academic faculty and managers, counseling faculty and managers, and institutional research analysts meet regularly to review data and improve placement logic in the registration process to ensure that students take the appropriate mathematics and English classes with many completing in the first year. Professional learning and the online education program have provided many options for training faculty on topics such as humanizing the online classroom and equity-minded teaching practices which likely improve the student experience.

22. What professional development can the Commission coordinate to support your Institution in achieving its student success goals within the next three-year cycle?

Our system, and those who volunteer to serve as visiting team members, could benefit from training and norming on the distance education review of courses and use of the rubric. Providing more opportunities for colleges to discuss examples of their approach to developing narrative to accompany public-facing data would be helpful. Providing spaces for colleges to review and rate ourselves with rubrics is also helpful, especially discussing the exercise with other colleges and hearing their examples with a focus on disaggregated data. The opportunity to hear from the commission regarding current events and/or actions at the federal level is always appreciated.

23. Please confirm you have reviewed your institution's program listing in the Accreditation Platform. In the box below, please select one of the following.

- I reviewed the program listings and all of my institution's programs are correctly listed
