Discussion Items

Future Meeting Dates – Approved. Nora, first. Tommy, second.

SLOA Competency Areas

Catie initiated a discussion on the competency areas for the upcoming year, seeking input on the necessity and definitions of each area. The team discussed the possibility of merging certain areas, such as communication and computation, and eliminating the 'other' category. They also considered the inclusion of information competency within the critical thinking area. The conversation ended with a plan to gather data on the number of courses assigned to each category to inform future decisions.

Information Items

CCN/Cal-GETC updates

Michelle discussed the implementation of CalGETC standards 1.2 and the potential approval of math for teacher courses in fall 2026. She also mentioned the need for clarification on the CalGETC standards and the possibility of legislative action regarding partial certification. The team proceeded with the common course numbering phase 3, with some concerns raised about the denial of courses that didn't follow the template. The team agreed to review and potentially modify the template to ensure compliance. Michelle discussed the ongoing process of template revisions and the potential use of AI in template creation. She mentioned that the templates are currently focused on CID, but there may be modifications to accommodate different core standards. Michelle also mentioned that they will have a debrief in Sacramento on May 8th to discuss the future of common course numbering and the changes they will make. She encouraged the team to submit both A and B in the fall, even with an extended effective date of fall 2027, to avoid potential pitfalls and consequences.

Michelle advised the team to wait until necessary for submitting courses for Common Course Numbering, especially for articulation. She suggested maintaining the current course structure and adding additional components in part 2. She also mentioned that the Common Course Numbering process has not gone as expected due to issues with the templates and variable topics. She assured that the team's articulation would be retained when going through curriculum. She also explained the faculty-driven process of creating templates, which involves feedback from faculty and surveys. She mentioned that while the Cal State and UC faculty are invited to the convenings, not many participate.
