Citrus Community College District Project Update

2010 Report to Our Community
by the Measure G Citizens Oversight Committee

January 2011

To Our Community:

On behalf of my fellow members on the Measure G Citizens Oversight Committee (COC), it is my pleasure to present the sixth edition of our Annual Report to the Community. The COC is an open public forum comprised of members of local taxpayer, business, student, senior, and community groups. Representative appointees serve on the committee to monitor and report the progress of work being accomplished at Citrus College through funds made available by the approval of Measure G in March 2004. Quarterly meetings are scheduled and the public is welcome to attend and participate. Meeting locations, dates and times are posted on the Committee's website (<http://www.citruscollege.edu/finance/bond>).

As required by Proposition 39, the Citizens Oversight Committee has reviewed all expenditures authorized by Measure G to ensure these funds are spent only on facility improvements. We have reviewed the expenditures and projects, and find the District is in compliance with the requirements of the California Constitution and all actions are consistent with the language approved by voters in the Measure G local bond measure.

Because of your support of Measure G, you have created a positive culture of pride that is extremely rare within college communities. You have made Citrus College a premier learning institution and, most importantly, a place of great opportunity for our residents. Citrus College's leadership and staff are to be commended for their conscientious management to maximize Measure G dollars. Your support is the driving force to help ensure that Citrus College continues to be a leader among community colleges within the San Gabriel Valley. We cannot thank you enough for your investment in Citrus College and the community.

Sincerely,

Mark Ferrari
Committee Chair, 2008-2011

2010 Green Campus Leadership Award

At the 2010 Green California Community College Summit, Citrus College received the Green Campus award for sustainability programs and policies that reduce the campus carbon footprint through significant energy savings, creating green curricula, implementing green building standards, and waste reduction.

The completion of the Central Plant in 2007 has significantly helped the college reduce its carbon footprint. This state-of-the-art heating and cooling system was funded by the Measure G bond approved by voters in 2004, and allows the college to avoid using mechanical equipment during peak electrical usage times.

\$25,000 Grant from Sempra Energy Foundation

Citrus College received a \$25,000 grant from Sempra Energy Foundation to provide scholarship support for community college students seeking certification or training for green jobs.

Citrus College will use the grant to provide scholarships for students who are working toward their associate degrees in programs made possible by projects such as the new state of the art Career Technology facilities.

"We are extremely honored by this gift from the Sempra Energy Foundation and consider it a validation of the efforts we have invested into exploring these important issues," said Trustee Gary Woods, member of the Citrus Community College District Board of Trustees.
