CITRUS COLLEGE

Institutional Research, Planning and Effectiveness

IRPE DID YOU KNOW?

NOVEMBER 2026

Last spring, as part of the Community College Survey of Student Engagement (CCSSE), Citrus College students were asked four questions about artificial intelligence (AI).

This is what they told us!

75%

Most students know AI

About three in four students **(75%)** are familiar with AI tools like ChatGPT, Google Gemini and Grammarly.

7%

Few students use AI for coursework

Only about **7%** of students use AI tools often or very often for coursework.

87%

Frequent AI users notice improved learning

Among students who use AI often or very often, about **87%** said it has improved their learning.

35%

Instructors lead the way

About **35%** of students received guidance from instructors on AI accuracy.

Highlights from Different Student Groups

Familiarity with AI tools is highest in two majors

Physical science and math students **(93%)**

Administration of justice students **(92%)**

All students **(75%)**

Both majors topped every other major in familiarity.

Hispanic students: Knowing AI vs. using it

Familiar with AI **(77%)**

Use it for coursework **(5%)**

High familiarity, but few use AI for their classes.

First-generation students: AI has improved my learning

First-generation **(40%)**

Their peers **(36%)**

First-generation students were slightly more likely to agree.

Thank you, students, for sharing your experiences with AI – your responses help Citrus College continue to improve. ***Stay tuned!*** *More CCSSE results are coming your way!*
